

DEFINITIONS

Building Construction

- The fabrication and erection of a building by assembling or combining building components, systems and subsystems. (*Dictionary of Architecture and Construction 4th ed. By Cyril M. Harris, c2005, Eng'g/Ref 720.3 D554 2006, Reference Scetion, University Library*)

Construction

- All the on-site work done in buildings or altering structures, from land clearance through completion, including excavation. Erection and the assemble and installation of components of equipment. (*Dictionary of Architecture and Construction 4th ed. By Cyril M. Harris, c2005, Eng'g/Ref 720.3 D554 2006, Reference Scetion, University Library*)

Construction Building Materials CBM

[Retrieved January 24, 2014 from <http://www.cbm1946.com/>]

Construction Building Materials has been serving the professional builders and re-modelers as well as the do-it-yourselfers since 1946. CBM has also provided building and maintenance supplies to commercial-industrial and institutional accounts. CBM has combined the finest of building products with a knowledgeable staff and the best delivery service to allow its customers to be more efficient and more profitable.

McGrawHill Construction Sweet Network

[Retrieved January 24, 2014 from <http://products.construction.com/>]

Provides wide range of building products and services. You can search topics about construction.

Building Technology from Federation of American Scientist technology Program

Retrieved January 24, 2014 from <http://fas.org/blog/btech/>.

This gives us the information on how to develop and enhance the technology in building infrastructures.
